

STATE OF HAWAII
DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES
INFORMATION AND COMMUNICATION SERVICES DIVISION

HONOLULU, HAWAII

May 13, 2013

ADDENDUM A

INVITATION FOR BIDS
No. IFB-13-002

TO
FURNISH, DELIVER, INSTALL, AND PROVIDE SUPPORT MAINTENANCE FOR A VIDEO
SURVEILLANCE MANAGEMENT SYSTEM WITH CAMERAS FOR SIX (6) TELECOM SITES FOR
THE INFORMATION AND COMMUNICATION SERVICES DIVISION,
DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES

Updated Timeline:

- Friday, May 17, 2013 (4:30 p.m. HST)
 - Due Date for Questions from Potential Bidders
- Wednesday, May 22, 2013 (1:30 p.m. HST)
 - Sealed Bids will be received up to and opened at (Subject to Change) 1:30 p.m. (HST) on May 22, 2013 in the Information and Communication Services Division (ICSD) Kalanimoku Building, 1151 Punchbowl Street, Room B-10, Honolulu, HI 96813.
 - Timely receipt of offers shall be evidenced by the date and time registered by the ICSD time stamp clock in room B10. Offers received after the deadline shall be returned unopened.

The following additional information is provided as answers to questions submitted by potential bidders:

Q1: Are cameras going to be recording audio 24/7?

A1: Recording of 24x7 audio is not a requirement.

Q1: Is there enough bandwidth at each site to support data of live video streaming over customer's WAN network?

A1: All sites except "ICSD Round Top Radio Facility" (TMK 2-5-19:003), will have access to a minimum of 100Mbps Ethernet connectivity. "ICSD Round Top Radio Facility" will have no less than 1.5Mbps and no more than 50Mbps. The State will be responsible for providing the appropriate network/telecommunications equipment to connect to the RJ-45 Ethernet interface on the cameras.

Q3: How many days of storage is required for server?

A3: 30 days minimum of storage is required on the Video Surveillance Management System. Capabilities to archive to an existing storage solution are needed for anything beyond 30 days. Archiving will be to an existing storage solution already in production use by the State of Hawaii.

- Q4: Are there any wire/conduit installation standards to follow when installing cameras in room?
- A4: Cable trays will be utilized if available. If cable trays are not available, cables should be enclosed in wire moldings for aesthetic purposes. Cables should be run through false ceilings when available.
- Q5: Per Specifications, Section 2C, page S-2, states "The installation shall be performed by a qualified manufacturer-authorized technician/engineer. The state may install all or some of the equipment ordered using its own personnel. Installation by the state shall not nullify the warranty service in any way." If you can clarify what equipment/portion of work the State intends to install and/or assist with, it would help with installation planning and the estimation process?
- A5: The State does not anticipate installing and/or assisting any of the cameras or Video Surveillance Management System. Section 2.1 C on page S-2 was included in the event the State needed to assist and/or install the Video Surveillance Management System at the ICSD Data Center.
